

VEGAS STAR ROULETTE

The following is a summary of the game rules.

Vegas Star Roulette is just like a traditional roulette game except that the result is now determined by a random number generator and you place your bets via a touch screen on your individual layout. This greatly increases the level of comfort you experience while playing as you no longer have to lean and stretch across a layout to place your chips. Your chances of winning on this game are the same as that of a traditional roulette table.

HOW TO PLAY

- Insert note(s) to receive on-screen credits.
- To place a bet during the betting period, select the desired betting chip and either move the chip to the desired location or touch the desired location to complete the bet.
- The dealer display screen will show the result and winning bets will be displayed on each player terminal and increment the credit meter.
- A new game will commence once the result has been finalised and all winning bets have been paid.
- If the winning number displayed on the display screen is different to that displayed on the player terminal, payouts will be made based on the outcome displayed on the player terminal.

- A.** One Number or 'Straight Up'
- B.** Two Numbers or 'Split'
- C.** Three Numbers or 'Street'
- D.** Four Numbers or 'Corner'
- E.** Six Numbers or 'Six Line'
