

HOW TO PLAY

CARIBBEAN STUD POKER

THE FOLLOWING IS A SUMMARY OF THE GAME RULES

The game is based on Five-card Stud Poker, where you play individually against the house, therefore, one deck of 52 cards is used.

HOW TO PLAY

For an initial stake or Ante, players receive five cards face down whilst the dealer receives four cards face down and one card face up. You have two options:

- If you do not think you can beat the dealer's hand you may fold and forfeit your Ante.
- If you think you can beat the dealer's hand and elect to continue, you are required to have an additional bet, which must be twice your Ante.

The dealer requires an Ace and King (which is the smallest possible hand of play), or a pair or higher to make a hand or to open. The dealer then compares their hand against each individual players and the highest poker hand wins. Winning hands receive a payment of even money on the Ante and payments will be made as per the payout odds on the Bet.

If the dealer does not open, all remaining Ante bets are paid even money and each additional Bet is void.

PROGRESSIVE JACKPOT

Caribbean Stud Poker also has a jackpot bet which can be placed by the players. Before each game and prior to the dealing of any cards you have the opportunity to participate in the displayed jackpot prize. To do this, place your jackpot wager into the jackpot slot adjacent to the regular betting boxes. This makes you eligible for a jackpot prize, in addition to the regular payment made to a winning bet. You receive a jackpot payout on a qualifying hand regardless of whether the dealer opens or not.
